Nutek Wheels is setting new industry standards for unique finishes and wheel designs that challenge the status quo. We know all about three piece wheels, our founders have over 40 years of combined experience, and we have been building modular wheels for more than 30 years. In fact, our heritage spans back to the beginning of the three piece wheel industry in the U.S.,....back when the most widely used application for these highly engineered wheel products was mostly in GTP racing. Over the years, designs have evolved, technologies have improved, and production processes have become far more precise. The result is a finely crafted wheel that is just as much "at home" fitted on any of the finest automobiles in the world, as it still is in the highly competitive environment of world class racing venues.

"For the Serious Motoring Enthusiast"

Classic Series designs are the embodiment of wheel styles that have stood the test of time. Each has evolved as a modern day representation of timeless beauty that is embraced by motoring enthusiasts as a statement of "fine taste" in automotive styling and appeal. By their very nature, each "Classic" series wheel design enhances the natural beauty and fine lines of any automobile fortunate enough to be fitted with a set of these finely crafted wheels.

Series 301

Series 304

Nutek designs are the ultimate expression of the wheelmaker's art. Each model is a unique creation that blends timeless principles of design with the latest in cutting edge styling.....all carefully rendered through the technical capabilities of Nutek's skilled craftsmen. By their very nature, many of the subtle nuances of each Nutek wheel are ultimately custom designed by its owner. Nutek encourages each customer to become personally involved in the creation of his or her set of new wheels. The result, is a wheel finish and appearance that is "uniquely yours". In essence, a "one of a kind" set of wheels that you can enjoy for years to come.... pleased with the knowledge that you played a key role in creating a "personalized" set of "car jewelry" for your fine automobile. There are no limits. If you can imagine your ultimate wheel appearance..... it is likely that Nutek will be able to create a wheel to match your "heart's desire".

Go to nutekwheels.com and check out our wheel configurator to start creating your "personalized" set of wheels today.
