

VORSTEINER CLK63 AMG BLACK SERIES

The CLK 63 AMG Black Series front DTM add-on spoiler is designed to bolt onto the factory bumpers to further improve aerodynamics & stability of the vehicle during high speed driving conditions.

Additionally an enhanced rear carbon fiber deck lid spoiler balances the downforce of the front end with a more aggressive extended wing profile.

Vorsteiner's Carbon Fiber Honeycomb Matrix (CFHM) structure gives our parts superior stiffness, strength & durability compared to traditional hand laid carbon fiber and fiberglass components.

Aerodynamic & Accessories Guide:

VRS aero front add-on chin spoiler dry carbon fiber
VRS aero rear add-on deck lid spoiler dry carbon fiber

Perfection Redefined.
